### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The title of the invention has been changed to: --A method of Fabricating a Heat Exchanger—

On page 1 in the Specification after the title, the statement of priority has been amended as follow:, -- This a divisional application of U.S. Serial No. 09/778,310, filed February 7, 2001, entitled "Heat Exchanger," now U.S. Pat. 6,964,296.--

### ***Remarks***

1. The title of the invention was changed to better reflect the invention. See *e.g.* Claim 1 ("A method of fabricating a heat exchanger ..."); *Cf* U.S. Pat. 6,964,296 (parent application entitled "Heat Exchanger.").
2. The statement of priority was amended to reflect the issuance of the parent application.
3. Applicant's arguments in the response dated September 19, 2005, have been found persuasive.

Art Unit: 3726

4. While DE 852,249 discloses a similar heat exchanger assembly, wherein the tube runs extend a short distance out of the plate fin slots, the method for fabricating the assembly is different. The Altavista English translation indicates that the assembly is dipped in a tin bath, rather than using a brazing oven to conduct brazing. The use of a supporting surface for conducting brazing corresponds to brazing in a brazing oven, allowing the "fins to settle under gravitational forces onto said tube runs." See Specification, page 12, line 9-16. Thus, the reference does not teach steps d) and e) of claim 1, steps b) through d) of claim 8, nor steps b) and c) of claim 12.
